In this tutorial you will be taken through the steps of creating a Flickr account. The tutorial will also help allow you to do the basics of Flickr: upload a picture, title, tag and comment on a photo. The tutorial will only discuss two other features which are the geotag and photo sharing feature. Flickr allows its users a wide variety of other options that will not be covered in this tutorial.

**Step 1** - You must have a Yahoo! account. If you do not you must first create a Yahoo! account. From the Flickr webpage you need to create a Flickr account. If you have one already you may simply sign in.

**Step 2** - Create a Flickr account by using you Yahoo! ID and password.
**Step 3** - Create the Flickr account

![Create Flickr Account](Image)

Press this button

**Step 4** - Getting started. Let’s focus on step number two (2) first. Let’s upload a picture.

![Upload Picture](Image)

Press #2

**Step 5** - Follow the first two steps in the next section to upload a picture. Step six of this tutorial will pick up step three of this screen shot.

![Follow Two Steps](Image)

Follow these two steps
**Step 6** You can add titles and tags to your photo here as well as a comment or description of your picture. **Tags** allow you to find photos by commonality (ex. Names (Johnny), location (Germany), etc.). **Titles** allow you to give a description of the picture in detail. Describe the picture to help the viewer gain context. **BE SURE TO PRESS SAVE AT THE BOTTOM OF THE SCREEN.**

![Image of Flickr upload page]

**Step 7** The main page. In the shot on the left you see the top portion of the page and on the right you see the bottom portion of the page. The screen shot on the **right** shows where you can add comments to your photo or other friend’s photos. The screen shot on the **left** is where we are heading next. **Click on the “Add to your map”**

![Image of Flickr main page]

Add a tag here (Germany). This will allow you to find photos in common at a later date.

![Image of Flickr main page]

Put a title here to detail the picture (Roulade)

Typical German fare while we were on our tour in Germany in 2007

![Image of Flickr main page]

Add comment here

Click on the “Add to your map” button
Step 8: Now it is time to place your picture on the map. The picture can be placed as general or specific as you like by using the toggle on the right side of the map. Just simply drag and drop the picture. The second map shot is more detailed to give you a comparison. The second map I placed the photo in Germany proper.
**Step 9** - The last thing is now to simply invite people to share your photos with. On the contacts button on the menu bar select INVITE FRIENDS from the drop down menu to get to the screen below. You do need to know your friends e-mails. If you have that information it is that simple as filling in the boxes below and hitting send.

![Image of Flickr's 'Send an Invite to Flickr' screen]

Click on contacts first then select invite friends to get to this screen

Fill in the following boxes to invite your friends

**Step 10** - You’re done! This tutorial has given you instructions on how to do the following:

- Create a Flickr account
- Upload a photo into Flickr
- Create a title, description, tag, geotag, and comment for your photo
- Share photos with other people

Flickr is a web based community that centers on video and photo sharing. This tutorial is only meant to be a cursory introduction to the website to show you some possibilities in your classroom. There are more features that can enhance the learning environment. This though is for your exploration and other tutorials.
